Notes

Sunbird Index.

Volumes 1 to 44.

THIS INDEX is compiled from the indices of volumes 1 to 44 of The Sunbird published by the Queensland Ornithological Society Incorporated (QOSI) which operates under the name of Birds Queensland.

Common names used follow Christidis, L. & W.E.Boles (2008) Systematics and Taxonomy of Australian Birds as much as possible

Earlier names have mostly been updated. At times this it has not been possible as access to sufficient information is not available.

Some species are not on the current Australian list. Their names remain unchanged.

SCIENTIFIC Names are not included in the original indices and are not included here. Perhaps one day someone will add these to this index.

VERIFICATION In some cases there seems no way of verifying what species the name the original index refers to as no scientific name was included in the original. Example: Little Grebe probably refers to Australasian Grebe but could refer to the species not common in Australia.

ACCURACY Some irregularities were found in the original indices and have been corrected. Others probably still exist.

On occasions the species listed could not be found on the page stated and on other occasions the incorrect species is included in the index. Example: An index listing for Swamp Harrier should have been Spotted Harrier. Because of the scope of this work not all entries in the originals were checked.

Issue numbers are only included where numbering recommences at page 1 in issue two.

REFERENCES have been included to assist in the changing from older names to current names. Example:

Great Egret, See Eastern Great Egret.

THE AUTHOR INDEX is a direct copy from the originals and is found in a separate document.

The compiler would appreciate notice of any inaccuracies found so these may be corrected

Common Name	Volume	Page(s)
Albatross, Antipodean	36 (2)	34, 50
Albatross, Black-browed	3	53
Albatross, Black-browed	14	48
